Inside, the ultra-high ceilings in the living area give an enormous sense of space and allows the high set windows to flood the area with natural light and allow the cooling breezes to ventilate the home. The open plan kitchen is packed with storage space and the built-in fridge space keeps the area nice and tidy. There is a powder room downstairs so there is no need for you guests to travel upstairs to use the facilities.

The main bathroom and the bedrooms are located on the top level, all of which open out onto an internal balcony which gazes out over the lower levels and towards the pool. Each bedroom includes floating timber floor, built in robes and split system air conditioning for exceptional comfort. Alternatively, all windows are louvered and are perfect for allowing the fresh dry season air to circulate throughout the home.
