PLEASE NOTE: we anticipate the granny flat construction to be completed in June 2026 (pending weather and DA approvals). During the construction, a temporary fence will be erected along the left-hand side of the home along the existing drive-way and approximately six meters from the rear of the home. The carport over concrete and existing fibro building to the rear yard will be demolished during the construction of the granny flat. The concrete driveway will be common area during granny flat construction, and as such, this is not be blocked at any stage. Until granny flat construction is completed, there will be no off street parking available. Following completion of the granny flat, a Colourbond fence or similar will be installed in a similar arrangement to that noted. Access to backyard will be via new stairs installed off the back patio. The existing paved path in front of the property will be extended to provide off street parking. Again, the driveway will be common property and is not be blocked by the tenant of the main (front) property.
