By Appointment.

This stunning home is surrounded by established trees and open outlooks; the property enjoys a serene setting with minimal neighbouring impact and tranquil views across the natural landscape. This acreage home is set on a generous 3,000m² parcel of land. This quality-built residence offers a peaceful lifestyle defined by space, privacy and a strong connection to nature.

Originally designed as a 4-bedroom home, the layout was customised to create a spacious three-bedroom residence with multiple living areas. This flexible floor plan can be easily adapted to accommodate a 4th or even 5th bedroom, providing excellent scope for growing families or changing needs.

Inside, the home offers a practical and well-considered layout, including a large entry, high ceilings, quality finishes, and tiled flooring throughout. Multiple living zones, including a separate retreat and dedicated office, allow for both family living and work-from-home flexibility. Comfort is ensured with ducted air conditioning and a wood fireplace.

The kitchen is well-equipped with Smeg appliances, soft closing doors and draws, ample storage including a large pantry. A spacious laundry with generous bench space and abundant storage, designed to accommodate the needs of any family. Making this home ideal for everyday living and entertaining. The home flows seamlessly to the alfresco area, complete with tiled flooring, timber deck, glass fencing and automatic privacy screens. Built in 2019 by CMG, the home features brick and render construction, excellent insulation and Bradman tinted windows and doors throughout.

A standout feature of the property is the impressive 10m x 12m three-bay drive-through shed, with a high central clearance of approximately 4.5 metres, ideal for caravans, boats, or large vehicles. Complete with an ensuite, kitchenette, and multiple internal areas, this space offers excellent potential for conversion into a granny flat, guest accommodation or private workspace-well suited to multi-generational living or additional income.

The property is fully fenced with an electric gate and includes established gardens, water tanks with irrigation, a shade house, and a variety of fruit trees and edible plants, creating a practical and low-maintenance outdoor setting.

The environment is rich with native wildlife, including frequent visits from kangaroos and an impressive variety of birdlife, with over 30 species recorded in the area, creating a unique and relaxing acreage experience.
