

58 Karissa Dr, Goonellabah, NSW 2480

Sold - \$515,000

House 4  3  2 

Prestige Plus

Set high on the Northern Ridge at the edge of Goonellabah is a master built brick and tile home with a double garage and grand entrance façade featuring double doors. This family home is towards the end of a cul-de-sac set amongst other quality residences and is sadly being placed on the market by its original owners. On entering the foyer with its vaulted ceiling and feature tiles, you will find a carpeted living area with a sliding door out onto the north facing balcony. The finely appointed kitchen features a gas cooktop, electric stove with range hood, dishwasher and well lit walk-in pantry to hold the most avid chef's cooking supplies. The kitchen flows into the adjoining sun soaked, open plan, dining/family area which also opens out onto the balcony and features a large picture window with views to the northern hills. On this level, you will pass a large linen cupboard along the tiled hall as you move towards the master suite that features a built in robe, ensuite with separate toilet and entry onto the balcony. There are also two generously sized carpeted bedrooms both with built in robes and quality window coverings. The three-way master bathroom is light and airy with a generous shower, large vanity and built in towel cupboard. Downstairs the new homeowner will find a fourth bedroom, third toilet and another tiled living area with more storage space! The laundry is also situated downstairs and is complete with fridge space and enough room to set up a sewing or study area. It opens to a small paved area that allows entrance to under the house where the man cave can be set up and store all the toys any handyman may need. Outside, the home is fully fenced with low a maintenance landscaped garden. Entry to the backyard can also be obtained through double gates that allow for easy trailer access. The backyard features a tropical pool area complete with built in pool and pool house to wile away the summer afternoons. This master residence has quality fittings both inside and out. It is kept cool in summer with ceiling fans in most rooms and kept warm in winter gas heating. This home is the full package and is waiting for its new family.
