MIO delivers townhouse residences with a difference, where each block has been meticulously designed for a variety of buyer types. Varied roof pitches allow for high ceiling heights, mixed exterior materials provide an individual touch to each block, and high levels of finish ensure MIO will be as impressive on the inside as it is on the outside.
DNA Architects have planned MIO to generate a sense of community and provide flexible options with generous living areas & shared landscape spaces. Choose from 3 or 4 bedroom terrace houses, many with wide frontages, or opt for a 2 bedroom townhouse with the rarity of side by side double or even triple lock up garaging.

MIO embraces Googong's commitment to being a 5-Star Green Star Community as a future proofed sustainable development with fibre to the home, shared electric vehicle charging stations, recycled grey water to toilets & gardens & an innovative solar share system site wide.

Developed & built by Base Developments & Milin Builders following designs by DNA & interiors by LB Design, MIO offers function & style with plenty of room to move both inside & out.
